

New York State Green Procurement Program  
Response to Comments on

**Proposed Specification on Disinfectant Delivery Devices**

**Background:** A specification on disinfectant delivery devices was given tentative approval by the Executive Order 4 Interagency Committee on April 15, 2022. This was part of a package of cleaning products specifications designed to align with the work done on the new multi-state green cleaning contract (FAC118) led by the State of Massachusetts.

**Commenting Entities: Healthy Schools Network**

**Issues Raised by the Healthy Schools Network During the Comment Period:**

1. **Add a requirement that delivery systems only use those appropriate products that are fragrance free**

**Comments:**

A new requirement should be added that systems only use products that are designated fragrance free.

**Response:**

This is for the systems themselves and not the products that go into them. Any preference for fragrance free products would need to be done in the disinfectants and sanitizers specification.

**Recommendation:**

Leave the tentatively approved specification as is.
